

Orientation Week

7/1/2019-12/1/2019

Registration Day

Monday, 7 January 2019 – On this day, we welcomed our new brothers and sisters. They enrolled in the various programs that St. Nicholas' Home has offered namely Massage Training, Pastry Training, IT Training as well as Skills Development Centre. This year we had an overwhelming response for IT training course as we have about 20 new students! We had never had this much before. We are so pleased that the people have become aware of the programs that we have here. We look forward to teach them of new skills so that they are well-equipped when they graduated later.

After registration, these trainees were showed to their new dormitories and they develop new friendships with other trainees from various part of Malaysia. During the orientation week, we have several activities laid out to them to help them adapt in the new environment. So far, these trainees have adjusted well with Home's rules and regulation. We have their best interest at heart.
